FEE BPS

Executive summary

This Report translates the plan's 20xx Form 5500 filing and audited financial statement package into a concise, plan-sponsor-friendly discussion document. It highlights what can be observed from public filings, where the plan appears strong, and which items should be validated with current provider disclosures and plan records.

ENDING NET ASSETS

\$XXX.XM

XX.X% year-over-year increase

PARTICIPANTS WITH BALANCES

X,XXX

X,XXX active participants

NET ASSET CHANGE

\$XX.XM

Includes investment and cash-flow activity

Plan confidence lens

Dimension	Signal	What the filing suggests
Plan growth	Strong	Assets increased from \$88.1M to \$109.0M, supported by positive market experience and positive net cash flow.
Participant engagement	Report	The plan has 2,453 participants with account balances and 457 separated participants entitled to benefits. This may create communication, education, and account consolidation discussion points.
Fee visibility	Visible	Schedule C identifies direct recordkeeping and advisory compensation; a complete fee review should still include 408(b)(2), 404a-5, fund expenses, and service agreements.
Plan design	Competitive	Immediate eligibility, safe harbor matching contributions up to 4%, and after-tax contributions are positive design features to validate against workforce goals.

Top 3 items to validate with plan records

These are not conclusions from the filing. They are the highest-value discussion points for a plan sponsor or committee.

- 1 Fee documentation**
Confirm direct and indirect compensation using 408(b)(2), 404a-5, fund expenses, and service agreements.
- 2 Participant behavior**
Review terminated participant balances, loan usage, distribution activity, and education opportunities.
- 3 Provider accountability**
Clarify which provider owns each part of the annual fiduciary process and how decisions are documented.

Plan economics and cash flow

The 2024 filing shows a plan with meaningful scale, strong contribution, inflows, and positive investment experience. The analysis below is based on the Form 5500 and audited financial statement package and should be reconciled with recordkeeper reporting before decisions are made.

Key Form 5500 and financial statement metrics

Metric	20XX value	Plan discussion implication
Beginning net assets	\$XX,XXX,XXX	Baseline for annual growth and investment results.
Ending net assets	\$XX,XXX,XXX	Large-plan scale; supports a more formal governance cadence.
Total contributions	\$XX,XXX,XXX	XX.X% of ending net assets; strong annual funding activity.
Benefits paid	\$XX,XXX,XXX	XX.X% of ending net assets; useful to evaluate distribution behavior and terminated participant strategy.
Participant loans	\$XX,XXX,XXX	X.X% of ending net assets; monitor participant borrowing trends and loan policy operation.

Provider, fee and plan design signals

This section organizes the major service-provider, compensation, and plan-design items visible in the filing. It is not a conclusion that fees are reasonable or unreasonable; rather, it identifies the areas a plan committee would typically document and monitor.

Provider accountability map

Compensation and expense visibility

Plan design signals

Feature	Observed in filing
Eligibility	[Eligibility, if available]
Safe harbor match	[Match, if available]
After-tax contributions	[Permitted under the plan provisions./ Permitted under the plan provisions.]
Discretionary contribution	[Summary]

Investment menu signals

Area	Observed in filing
Menu breadth	[Summary]
Target-date assets	[Summary]
Stable value	[Summary]
Fund expenses	[Summary]

High-value topics for committee discussion

- Are direct and indirect fees documented, benchmarked, and tied to service value?
- Does the plan's investment menu architecture make participant decision-making easier?
- Are terminated participant balances, loans, and distribution activity monitored as part of the annual fiduciary process?

From insight to action

Public filings are a strong starting point ,but they do not show the full fiduciary process. The next step is to compare the Form 5500 snapshot against the plan's actual provider disclosures, plan documents, investment policy, committee records, participant experience, and business objectives.

01

Confirm

Validate Form 5500 observations against provider reports, service agreements, fee disclosures, and plan documents.

02

Benchmark

Evaluate fees, services, investment menu structure, participant behavior, and governance practices against plan size and complexity.

03

Prioritize

Identify the few actions that matter most and assign accountability across the advisor, recordkeeper, auditor, payroll/TPA, and committee.

Recommended next step: Retirement Plan Consultation

In that conversation, Everhart Advisors will walk through the three highest-priority observations from this report, identify which documents are needed to validate the findings, and determine whether a deeper fee, provider, or fiduciary process benchmark is worth pursuing.

Documents that would help validate this review

408(b)(2) disclosure, 404a-5 participant fee disclosure, investment lineup, service agreements, plan document/adoption agreement, recordkeeper reports, and recent committee materials.

Need help finding the disclosures? We've prepared guides on how to find them on 20+ recordkeepers [here](#).

Appendix: source data and important notes

The items below summarize the primary sourced documents used to prepare this review and the limitations of a Form 5500-based analysis.

Source item	Where used in this review
Form 5500 basic plan information	Plan sponsor, EIN, plan number, plan year, effective date, participant counts, plan characteristics, and attached schedules.
Schedule H and audited financial statements	Net assets, investments, contributions, distributions, administrative expenses, participant loans, and annual change in net assets.
Schedule C	Reported service providers and direct or indirect compensation items visible in the filing.
Schedule D and Schedule H assets schedule	Common collective trust, stable value, mutual fund, and plan investment information.
Plan notes	Eligibility, safe harbor match, after-tax contributions, loans, hardship withdrawals, and plan operation descriptions.

Important limitations

- This review is based on public filing information and audited financial statement disclosures. It does not replace plan document review, legal advice, tax advice, investment advice, or a complete fiduciary audit.
- Form 5500 data may not capture all indirect compensation, investment expense ratios, managed account fees, participant transaction fees, revenue sharing, float, or sponsor-paid expenses.
- No conclusion is made regarding whether any fee is reasonable, any investment is prudent, or any fiduciary process is sufficient. Those questions require additional information and committee review.
- All observations are intended as discussion points for the plan sponsor or committee and should be validated against current provider records.

Selected calculations

Calculation	Formula
Asset growth	$(\text{Ending net assets} - \text{beginning net assets}) / \text{beginning net assets}$
Average balance	$\text{Ending net assets} / \text{participants with account balances}$
Direct admin fee bps	$\text{Reported administrative fees} / \text{ending net assets} \times 10,000$
Net cash flow	$\text{Total contributions} - \text{benefits paid} - \text{administrative fees}$
